Comments: I oppose the following:

1. Vast new tracts of land being fracked for Shale, Tight and CSG 2. The opening up of more gas fields to facilitate increased gas exports, driving domestic gas prices even higher, 3. The \$2.7B gift to foreign tax dodger Jemena 4. The massive transfer of wealth from gas customers to China and Singapore, that is the end result of this "deal";

I implore AMEC to put the interests of Australian Taxpayers first.

Thank You
