Comments: When are you so called political types going to stand up for our kids future!

We own nothing!

USA war machine is here instilling their Americancer across Aus, with your blessing Most countries are banning this practice including USA!

They don't live here, we do, and you capitulate to the oil company with an army!

They destroy countries, societies and cultures globally!

They steal countries resources and wealth and refuse to pay tax even, please tell me who the brain surgeon, wannabe CEO who thought it would be a great idea to contaminate our water supply on one of the driest continents on earth?

I'm sure I speak for many Aussies!

And I challenge you to put it to a vote, that's if we live in a Democracy!

I'm sure the vast majority would be opposed to this rubbish!
