DRAFT DETERMINATION – UPDATING SHORT TERM PASA

Alinta Energy appreciates the opportunity to provide feedback on the AEMC's draft determination on the *Updating Short Term PASA* rule change proposal.

Alinta Energy understands that AEMC intends to amend the definition of PASA availability to allow participants to reflect the recall time of their plant more accurately within a specific horizon specified by AEMO; and that the relevant period for a generator's PASA availability will be outlined in the Reliability Standard Implementation Guidelines.

While Alinta Energy supports the intent of these changes, to avoid duplication and increasing the burden on participants, it recommends that AEMO consider whether the existing system that participants use to submit recall times would still be required, or, alternatively how these changes could be pragmatically integrated to simplify the process and minimise manual effort.

Thank you for your consideration of Alinta Energy's submission, should you wish to discuss this further, please contact Oscar Carlberg at oscar.carlberg@alintaenergy.com.au, or on 0409 501 570.

Yours sincerely

Oscar Carlberg
