21 June 2022
Charles Popple
Reliability Panel Chair

By email: Charles.Popple@aemc.gov.au

Dear Mr Popple,

Request to extend the date of completion for the Review of the reviewable operating incident guidelines

The Commission acknowledges your letter, dated 9 June 2022, requesting that the Commission extend the date of completion for the *Review of the reviewable operating incident guidelines* by one month.

The Commission notes that given the complexity of issues that the Panel needs to consider for this review the Panel is no longer able to complete the review by 31 August 2022, in line with the terms of reference issued by the Commission dated 30 March 2022.

The Commission therefore extends the date of completion of the review by one month, to 30 September 2022. The Commission notes that the Panel does not consider this delay will result in any material issues for key stakeholders and is necessary to allow for the development of an effective solution.

Yours sincerely

Anna Collyer
Chair
