Ms Anna Collyer
Chair
Australian Energy Market Commission

Lodged electronically.

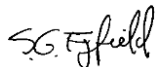

Subject: ERC0272 - Efficient reactive current access standards for inverter-based resources draft determination

Dear Ms Collyer,

Goldwind would first like to express its gratitude to the AEMC for considering the proposed rule reform around the reactive current access standards for inverter based resources.

The proposed changes are expected to streamline future Goldwind and other renewable projects which will ultimately lead to a smoother energy transition. We have duly considered the proposed draft determination published by the AEMC on the 15th December 2022 and through this letter express support for the proposed amendments with no further changes proposed.

Sincerely,

Sam Fyfield
