

The below submission has been lodged and confirmed on the AEMC Web site.

Submission Type: Rule Change

Reference: Sharing concessional finance benefits with consumers

Organisation: CWO REZist

Comments: Sounds like BS, spending taxpayers funds to build an energy system that will make energy unaffordable and then helping people pay their bills

How about we stop destroying native habitats and agricultural land and invest in an energy system that will enable industry and consumers to have abundant cheap energy. You are destroying Australia.
