Reference: Accelerating smart meter deployment

Organisation: n/a

First Name: Devorah Leah

Last Name: Gerari

Email: [REDACTED]

Phone Number: [REDACTED]

Comments: Hi

After carefully reviewing your proposal of Accelerating Digital Smart Meters deployment, I would like to express my opposition to the implementation of digital smart meters. I believe that these meters, which operate on Wi-Fi microwave radiation, pose a significant threat to human health.

Here is the reason why:

Back in the year 2013, a Digital Smart Meter was put on my property. Just a few days later we, me and my 4 children experienced various health symptoms such as: headaches, sleep problems, heart palpitations, eyesight problems, digestive disorders, children teeth didn't grow and jaws didn't grow, skin irritation, burning in the throat, dry throat, weight loss, memory loss and a lot more etc. I was forced to move out with my family from my home to a more safer home.

You argue that the digital smart meter will reduce energy costs, I must emphasize that human health and well-being take precedence over any potential cost savings. When these digital smart meters were installed in our homes, we were told they would lower our electricity bills. However, this was not the case; instead, the cost of electricity continued to rise every six months, regardless of the smart meter being installed.

Severe health damage from microwave radiation emitted by smart meters was scientifically proven in multiple studies from different countries.

One of them: "Adverse Health Effects from Radio-frequency Radiation" by David Carpenter MD and the Director of the Institute for Health and the Environment, which has been designated as a Collaborating Centre of the World Health Organisation, a position he is holding today.

This world is a beautiful garden that was made by G-d for us, people to enjoy in it and be G-odly Gardeners to keep this world alive by being kind to each other and use loving kindness and don't do any harm to each other.

Sincerely hope that you consider the harmful effects of wifi microwave radiation and trust that you wouldn't do harmful deployment of digital smart meters on your Australian people.

Thank you kindly for your time.

Devorah Leah
