

Submission Type: Rule Change

Reference: Accelerating smart meter deployment

Organisation: Odinisis Consulting Practice

First Name: Paul

Last Name: Busuttil

Email: [REDACTED]

Phone Number: [REDACTED]

Comments: (a) I am against the devious way that the sovereign Citizens of this country, have been socially engineered by the use of words like smart, inferring that if you don't comply, you are not "Smart".

(b) Over the last 20 years at least, there has been mounting evidence including substantiated congressional reports that these meters have always been detrimental to humanities health. Except for pacifying bureaucratic red tape; there has been very little by way of serious effort by our corporatized government, who clearly do not have our best interest at hart, and by definition under the real Australian constitution of 1901, these Gov corporation are continuing to commit acts against Australians' and do not serve the people of this country.
