Comments: I am writing in regards to the mandatory changes for smart meters by 2030. I do not think and request that nothing changed be mandatory. The Australian people do not take kindly to anything that is mandatory. I will not be getting a smart meter in my home, especially with many reports about health concerns associated with them. I would like the government to provide a health assessment on smart meters, with long term safety data and doctors to sign off on the health and safety of smart meters before I got anything installed in my house. I will be keep this as a receipt to acknowledge my concerns.
