

Submission Type: Rule Change

Reference: Accelerating smart meter deployment

Organisation: TyTechAutomation

First Name: Scott

Last Name: Cahill

Email: [REDACTED]

Phone Number: [REDACTED]

Comments: I am opposed to the roll-out of radiation-emitting smart meters because of the harm they do to people with electromagnetic hypersensitivity. For example, ... I personally feel the effects of electro hypersensitivity and do what I can around my home to reduce RF.

Radiation-emitting smart meters are particularly problematic for people with electromagnetic hypersensitivity.

Also a an electrician, I try to help others with simple solutions to reduce the effects of EMF, RF issues in their homes. Restrictions and customer choices to smart meters would be a smart move.
