Dear [REDACTED],

**Re: Category 2 Part 10 exemption – Braemar 2 Pipeline**

I refer to your letter dated 14 February 2024 for a Category 2 revocation application under Part 10 of the National Gas Rules (NGR) for the Braemar 2 Pipeline.

After assessment, the AER is **not satisfied** that Braemar 2 Pipeline meets the criteria for a Category 2 exemption under Part 10 of the NGR. The reasons are as follows<sup>1</sup>:

- Braemar 2 Pipeline is not a *single user pipeline* as defined under the NGR,<sup>2</sup> because it is not a *third party access pipeline*.
- Braemar 2 Pipeline is a transmission pipeline with a nameplate rating of more than 10 TJ/day.

Thereby, the AER has determined to revoke Braemar 2 Pipeline's Category 2 exemption under Part 10 of the NGR.<sup>3</sup>

This revocation is in effect from the date of this letter, i.e., 25 March 2024. Braemar 2 Pipeline's Category 1 exemption is still valid until 12 July 2028. Therefore, Arrow Energy is exempt from the obligation to publish information under Subdivision 1, Division 2, Part 10 of the NGR in relation to Braemar 2 Pipeline.

As required by NGR rule 102(7), please notify the AER if circumstances change such that the pipeline no longer qualifies for a Category 1 exemption. Rule 102(6) of the NGR requires the AER to maintain a public register of Part 10 exemptions. Barring personal information, details in your submitted revocation application may be published on the register along with this response.

Please contact [REDACTED] if we can assist further.

Yours sincerely

[REDACTED]
