
The below submission has been lodged and confirmed on the AEMC Web site.

Submission Type: Rule Change

Reference: Improving the cost recovery arrangements for Transmission non-network options

Organisation: National Rational Energy Network Inc.

First Name: Grant

Last Name: Piper

Email: [REDACTED]

Phone Number: [REDACTED]

Comments: We do not support any increase in regulated return to energy transition projects or businesses. The electricity industry was privatised many years ago to remove Government from the process and reduce costs to the taxpayer and consumer. The citizens should not be underwriting private business ventures. See attachments for further.

Submission Document: Transition Costs - Moran.pdf
