**National Electricity Amendment (Removing the requirement to publish transmission information guidelines) Rule 2025**

**I object to the Commission using the expedited rule change process as this is controversial - being most likely to significantly increase prices for Electricity Consumers & diminish all other aspects of the Objective of the NEL.  
There are NO Consumer Benefits!**

**The public has NO trust whatsoever in the [REDACTED]**

**A Moratorium on all Rule Changes must be immediately implemented with a Royal Commission expedited to comprehensively investigate the ongoing experimental failures [REDACTED] & to probe all the questionable actions of the [REDACTED]**

**There has been no genuine consultation with the public - who are bearing the brunt of a Generator/Network prioritised [REDACTED]**

"The idea that adding more & more renewable energy to the grid pushes power prices down has been comprehensively dismissed."
