The value of *energy data* which is accumulated for a period of 30 minutes and stored as a separate data record.

excess generation

Aggregate *self dispatch level* of *self-committed generation* which is in excess of the quantity needed to meet the expected *power system demand* and *reserve* requirements.

excess generation period

A period made up of one or more *dispatch intervals* where the sum of the aggregate of *generating unit self dispatch levels* and the required *regulating capability* (which forms part of the *contingency capacity reserves standard*) exceeds the forecast *load* or actual *load* during those *dispatch intervals*.

general purpose

The term applied by the National Measurement Institute to refer to the classification of a meter.

governor system

The automatic *control system* which regulates the speed of the power turbine of a *generating unit* through the control of the rate of entry into the *generating unit* of the primary *energy* input (for example, steam, gas or water).

load class

A grouping of customers with like *load* characteristics.

market ancillary services commencement date

29 September 2001.

maximum enablement level

The maximum *energy* output (MW) at which the relevant *ancillary service* can be supplied.

maximum lower angle

The maximum angle at the lower end of the relevant *ancillary service* profile.

maximum upper angle

The maximum angle at the upper end of the relevant *ancillary service* profile.

minimum enablement level

The minimum *energy* output (MW) at which the relevant *ancillary service* becomes available.

National Electricity Code

Has the same meaning as in the *National Electricity Law*.

[18] Chapter 10 Glossary
