

## **AEMC Reliability Panel**

### **Consultation on the Panel's review of the frequency operating standards for Tasmania**

The Reliability Panel (Panel) has commenced a review of the Frequency Operating Standards for Tasmania.

The Panel is seeking initial stakeholder comments and holding a Public Forum early in the consultation process so that the stakeholders can identify to the Panel any important factors that should be considered in the Panel's review of the standards. In particular:

- the proponents of new generating projects can identify the changes to the standards that would be necessary if their proposed generating units were connected; and
- stakeholders can identify relevant and important economic factors that the Panel should consider when assessing any changes to the standards.

The Panel will hold a Stakeholder forum to provide an opportunity for comments and questions on **Friday, 6 June 2008 at 10.00 AM in Hobart**. All Registered Participants and other stakeholders are welcome to attend. Anyone wishing to attend should contact the Panel at [registration@aemc.gov.au](mailto:registration@aemc.gov.au) by **Wednesday, 21 May 2008**. The location of the meeting is yet to be confirmed.

The Panel invites initial comments from stakeholders on this Review by **Friday, 23 May 2008**.

Submissions may be forwarded by email, mail or in person.
