

The below submission has been lodged and confirmed on the AEMC Web site.

Submission Type: Rule Change

Reference: Access, pricing and incentive arrangements for distributed energy resources

Organisation: NA

First Name: Cameron

Last Name: Cross

Email: [cameroncros@gmail.com](mailto:cameroncros@gmail.com)

Phone Number: 0434830498

Comments: If feed in costs are to be applied to residential solar, they should equally be placed on the commercial coal, wind and solar plants. Otherwise it is just giving the power companies the ability to take the power generated by residential solar for pennies on the dollar, by claiming "excess energy", and sell it back to other users at a premium. Consumers will not win from these regulations, we will all end up paying more.
