### **AEMC Rule Change Draft Determination: ERC0275 – Introduction of Metering Coordinator Planned Interruptions**

SafeWork NSW welcomes the opportunity to make a submission to the Australian Energy Market Commission's (AEMC) Draft Rule on the Introduction of Metering Coordinator Planned Interruptions.

As the regulator administering the Work Health and Safety legislation in NSW we always look at ways to reduce the likelihood of electrical workers carrying out energised (live) electrical work. We strongly encourage the AEMC to consider any implications any rule change might have to the work practices of electrical workers.

Yours sincerely,

Daniel Daoud  
State Inspector | Electrical Hazards Management | Engineering
