Submission Type: Rule Change

Reference: Implementing a general power system risk review

Organisation: Individual

First Name: Dr Stephen

Last Name: Theiler

Email: stheiler@swin.edu.au

Phone Number: 0398443577

Comments: I am totally against a further charge to individuals for exporting the power from their solar panels. We are already paying a daily rate for infrastructure. The policy change is a backward step for renewable energy. I have never made a profit from my solar panels and by the time i break even i will need to upgrade. If this policy goes ahead that would be in doubt. Shame on these backward greedy proposals.
